

HYG/LQD/TLT Risk Transmission

INTERNAL

Measure how high yield, investment grade, and long-duration bonds transmit risk to equities.

Author: Cerberus Research

Data Sources

- **market_ohlcv**: SPY, HYG, LQD, TLT daily OHLCV via yfinance
- **market_ohlcv**: SPY, HYG, LQD, TLT daily OHLCV

Key Findings

- Cross-asset risk transmission study: SPY, HYG, LQD, TLT | lookback=126 horizon=21

Executive Summary

NOTE

HYG/LQD/TLT credit and duration risk transmission to SPY equity. Measures cross-asset risk dynamics over a 20-year lookback.

Results & Interpretation

NOTE

Measure how high yield, investment grade, and long-duration bonds transmit risk to equities.

Main takeaways:

- Cross-asset risk transmission study: SPY, HYG, LQD, TLT | lookback=126 horizon=21

Objectives

NOTE

Evaluate whether the studied signal produces a measurable, repeatable edge.

Quantify the reliability of the observed patterns across the sample.

Methodology

NOTE

Cross-asset mode: correlations and lead-lag relationships between high yield (HYG), investment grade (LQD), long-duration bonds (TLT), and SPY equity.

Limitations

NOTE

Results are research-grade, not investment advice. The sample is limited to available data, and measured edges may not persist out-of-sample.

Glossary

Term	Definition
n / count	Number of observations or events in the sample.
edge	Average excess return versus the unconditional baseline.
hit-rate	Share of events with a positive forward return.
p-value	Probability of observing the result under the null of no edge.
*** / ** / *	Significance at 99.9% / 99% / 95% confidence.
α (alpha)	Intercept or active return versus benchmark.
β (beta)	Sensitivity to a reference factor or market.
σ (sigma)	Volatility / standard deviation of returns.
