Executive Summary

NOTE

Scans spot and perpetual price premiums across major crypto exchanges and measures perp basis and arbitrage opportunities.

Results & Interpretation

- Across the sample, the spot averaged +64224.67%.
- Across the sample, the spot averaged +1870.36%.
- Across the sample, the spot averaged +74.09%.

Objectives

NOTE

Evaluate whether the studied signal produces a measurable, repeatable edge.

Quantify the reliability of the observed patterns across the sample.

Methodology

NOTE

Live last prices are fetched via CCXT for Binance, Kraken, Bitstamp, Bitfinex, OKX, Bybit and Coinbase. Premiums are measured against the Binance spot/perp reference; basis is the average perp premium over spot.
