

Insider Cluster Buying Alpha

INTERNAL

Detect cluster insider buying patterns and subsequent alpha.

Author: Cerberus Research

Generated by the Cerberus studies framework · schema 2

Data Sources

- `sec_insiders/sec_insider_transactions`
- `fundamentals/fundamentals_curated`

Key Findings

- Cluster buy events: 0

Executive Summary

NOTE

Identifies cluster insider buying patterns and tracks them as a potential alpha signal.

Results & Interpretation

NOTE

Detect cluster insider buying patterns and subsequent alpha.

The study analysed 9,408 rows of data.

Main takeaways:

- Cluster buy events: 0

Objectives

NOTE

Evaluate whether the studied signal produces a measurable, repeatable edge.

Quantify the reliability of the observed patterns across the sample.

Methodology

NOTE

Analysis is run on the configured datasets with the parameters listed in the Study Configuration block. Results are aggregated into summary statistics, tables, and visual one-pagers for review.

Limitations

NOTE

Results are research-grade, not investment advice. The sample is limited to available data, and measured edges may not persist out-of-sample.

Statistics Summary

Glossary

Term	Definition
n / count	Number of observations or events in the sample.
edge	Average excess return versus the unconditional baseline.
hit-rate	Share of events with a positive forward return.
p-value	Probability of observing the result under the null of no edge.
*** / ** / *	Significance at 99.9% / 99% / 95% confidence.
α (alpha)	Intercept or active return versus benchmark.
β (beta)	Sensitivity to a reference factor or market.
σ (sigma)	Volatility / standard deviation of returns.
