

Fiscal Liquidity Impulse (Enhanced)

INTERNAL

Net liquidity impulse from Treasury cash balance, debt issuance, and Fed SOMA holdings vs SPY forward returns.

Data Sources

- **treasury/treasury_fiscal_features**: Treasury fiscal data: TGA, debt, cash flows
- **soma/soma_holdings**: Fed SOMA holdings

Key Findings

- Latest liquidity impulse score: -1.318
- Latest TGA: \$970.4B, smoothed impulse: \$-140205.4T

Executive Summary

NOTE

Enhanced fiscal liquidity impulse study. Combines Treasury cash balance changes, debt issuance, and Fed SOMA holdings into a net liquidity impulse score, then tests SPY forward returns across easing vs tightening regimes.

Results & Interpretation

- Across 495 events, the forward return averaged +0.81%. Returns were positive 61.8% of the time.
- Across 500 events, the forward return averaged +2.06%. Returns were positive 75.8% of the time.

Objectives

NOTE

Evaluate whether the studied signal produces a measurable, repeatable edge.

Quantify the reliability of the observed patterns across the sample.

Methodology

NOTE

Liquidity impulse = $-\Delta TGA - \text{debt issuance} + \Delta \text{SOMA}$. The impulse is smoothed (5-day MA) and converted to a z-score relative to a trailing one-year history. Regimes split at the median z-score.

Glossary

Term	Definition
n / count	Number of observations or events in the sample.
edge	Average excess return versus the unconditional baseline.
hit-rate	Share of events with a positive forward return.
p-value	Probability of observing the result under the null of no edge.
*** / ** / *	Significance at 99.9% / 99% / 95% confidence.
α (alpha)	Intercept or active return versus benchmark.
β (beta)	Sensitivity to a reference factor or market.
σ (sigma)	Volatility / standard deviation of returns.
