- **fred_latest/fred_latest_curated**

Key Findings

- Macro surprise index latest: 6545.2150

Executive Summary

NOTE

Builds a macro surprise index from FRED vintage/revision data and tests its predictive power for equity returns.

Results & Interpretation

- Across 4,040 events, the forward return averaged +0.50%. Returns were positive 97.8% of the time.
- Across 4,044 events, the forward return averaged +0.51%. Returns were positive 98.8% of the time.
- Across 4,044 events, the forward return averaged +0.57%. Returns were positive 95.9% of the time.
- Across 4,039 events, the forward return averaged +0.62%. Returns were positive 93.3% of the time.
- Across 4,034 events, the forward return averaged +0.77%. Returns were positive 89.9% of the time.

Objectives

NOTE

Evaluate whether the studied signal produces a measurable, repeatable edge.

Quantify the reliability of the observed patterns across the sample.

Methodology

NOTE

Analysis is run on the configured datasets with the parameters listed in the Study Configuration block. Results are aggregated into summary statistics, tables, and visual one-pagers for review.

Table 1. Macro surprise index (last 120 observations)

regime	count	avg_fwd_ret_...	median_fwd_ret_...	hit_rate_pct
Q1	4040	+ 0.50%	+ 0.49%	+ 97.80%
Q2	4044	+ 0.51%	+ 0.49%	+ 98.79%
Q3	4044	+ 0.57%	+ 0.49%	+ 95.94%
Q4	4039	+ 0.62%	+ 0.49%	+ 93.29%
Q5	4034	+ 0.77%	+ 0.49%	+ 89.94%

Table 2. Forward returns by surprise regime

Limitations

NOTE

Results are research-grade, not investment advice. The sample is limited to available data, and measured edges may not persist out-of-sample.

Glossary

Term	Definition
n / count	Number of observations or events in the sample.
edge	Average excess return versus the unconditional baseline.
hit-rate	Share of events with a positive forward return.
p-value	Probability of observing the result under the null of no edge.
*** / ** / *	Significance at 99.9% / 99% / 95% confidence.
α (alpha)	Intercept or active return versus benchmark.
β (beta)	Sensitivity to a reference factor or market.
σ (sigma)	Volatility / standard deviation of returns.
