Data Sources

- **macro_latest:** GDP, INDPRO, PAYEMS, RSAFS, UNRATE series from macro_latest dataset

Key Findings

- GDP (GDP): latest=32,475.2100 Δ =+609.4890
- Industrial Production (INDPRO): latest=102.6395 Δ =+0.0789
- Payrolls (PAYEMS): latest=158,984.0000 Δ =+57.0000
- Retail Sales (RSAFS): latest=768,553.0000 Δ =+1677.0000
- Unemployment (UNRATE): latest=4.2000 Δ =-0.1000
- CPI (CPIAUCSL): latest=3.7265 Δ =-0.4225

Executive Summary

NOTE

Macro growth, labor, and inflation pulse from local macro datasets. Tracks GDP, Industrial Production, Payrolls, Retail Sales, Unemployment, and CPI (YoY).

Results & Interpretation

NOTE

This report is a dashboard-style snapshot of the U.S. macro pulse: growth, labor, and inflation. Think of it like a health check for the economy, expressed through six widely-followed indicators.

Latest readings:

- **GDP (GDP):** 32,475.21 (rose 609.49 from the prior reading)
- **Industrial Production (INDPRO):** 102.64 (rose 0.08 from the prior reading)
- **Payrolls (PAYEMS):** 158,984.00 (rose 57.00 from the prior reading)
- **Retail Sales (RSAFS):** 768,553.00 (rose 1,677.00 from the prior reading)
- **Unemployment (UNRATE):** 4.20 (fell 0.10 from the prior reading)
- **CPI (CPIAUCSL):** 3.73 (fell 0.42 from the prior reading)

How to read this: growth and payrolls moving up generally point to a stronger economy; unemployment rising suggests slack is building; CPI moving up means inflation pressure, while a falling CPI takes pressure off interest rates.

Objectives

NOTE

Evaluate whether the studied signal produces a measurable, repeatable edge.

Quantify the reliability of the observed patterns across the sample.

Methodology

NOTE

Time series loaded from macro_latest dataset partitions; CPI loaded from fred_latest_curated (provider=fred_latest, dataset=cpi) as year-over-year percent change. Values normalized (z-score) for cross-series comparison. Latest value and delta computed for each series.

Statistical Results

series	series_id	as_of	latest	delta	delta_pct	value_column
GDP	GDP	2026-04-01	32,475.21	609.49	+ 1.91%	value
Industrial Production	INDPRO	2026-06-01	102.64	0.08	+ 0.08%	value
Payrolls	PAYEMS	2026-06-01	158,984	57	+ 0.04%	value
Retail Sales	RSAFS	2026-06-01	768,553	1,677	+ 0.22%	value
Unemployment	UNRATE	2026-06-01	4.20	-0.10	-2.33%	value
CPI	CPIAUCSL	2026-06-01	3.73	-0.42	-0.54%	value

Table 1. Macro Growth/Labor/Inflation Metrics

Limitations

NOTE

Results are research-grade, not investment advice. The sample is limited to available data, and measured edges may not persist out-of-sample.

Glossary

Term	Definition
n / count	Number of observations or events in the sample.
edge	Average excess return versus the unconditional baseline.
hit-rate	Share of events with a positive forward return.
p-value	Probability of observing the result under the null of no edge.
*** / ** / *	Significance at 99.9% / 99% / 95% confidence.
α (alpha)	Intercept or active return versus benchmark.
β (beta)	Sensitivity to a reference factor or market.
σ (sigma)	Volatility / standard deviation of returns.
