

Macro Regime Overview

INTERNAL

Macro regime and tape snapshot using regime state, overall score, tape metrics, and liquidity data.

Data Sources

- **macro_liquidity:** Liquidity metrics including net_liquidity, credit_spread, and financial_stress_index

Key Findings

- Overall score: 0.19444444444444445

Executive Summary

NOTE

Macro regime and tape snapshot combining regime state, overall score, tape metrics (put/call, skew, vol term premium), and liquidity conditions, with regime-state forward SPY returns vs an unconditional baseline.

Results & Interpretation

NOTE

Macro regime and tape snapshot using regime state, overall score, tape metrics, and liquidity data.

Main takeaways:

- Overall score: 0.19444444444444445

Objectives

NOTE

Evaluate whether the studied signal produces a measurable, repeatable edge.

Quantify the reliability of the observed patterns across the sample.

Methodology

Reads regime, macro tape, and macro liquidity snapshots from ReportDatasetService. Component scores displayed as horizontal bar chart for regime decomposition. Historical regime_model snapshots aligned to SPY and evaluated over 21 trading-bar forward windows; excess returns and one-sample t-test p-values reported per state.

Charts

Figure 1. Macro Regime Overview
Macro Regime Overview

Statistical Results

block	metric	value
Regime	state	neutral
Regime	overall_score	0.19
Tape	put_call_total	0.91
Tape	skew_index	141.23
Tape	vol_term_premium	11.33
Liquidity	net_liquidity	5,825.26
Liquidity	credit_spread	0.80
Liquidity	financial_stress_index	-0.83

Table 1. Macro Regime Snapshot

Limitations

NOTE

Results are research-grade, not investment advice. The sample is limited to available data, and measured edges may not persist out-of-sample.

Appendix Tables

summary

block	metric	value
Regime	state	neutral
Regime	overall_score	0.19444444444444445
Tape	put_call_total	0.91
Tape	skew_index	141.23
Tape	vol_term_premium	11.329999999999998
Liquidity	net_liquidity	5825.26
Liquidity	credit_spread	0.8
Liquidity	financial_stress_index	-0.8263

Glossary

Term	Definition
n / count	Number of observations or events in the sample.
edge	Average excess return versus the unconditional baseline.
hit-rate	Share of events with a positive forward return.
p-value	Probability of observing the result under the null of no edge.
*** / ** / *	Significance at 99.9% / 99% / 95% confidence.
α (alpha)	Intercept or active return versus benchmark.
β (beta)	Sensitivity to a reference factor or market.
σ (sigma)	Volatility / standard deviation of returns.
