

Sector Leadership Rotation Decay

INTERNAL

Measure leadership persistence and defensive rotation as signs of weakening market internals.

Data Sources

- **ohlcv_daily**: Daily prices for SPY and sector ETFs

Executive Summary

NOTE

Measure leadership persistence and defensive rotation as signs of weakening market internals.

Results & Interpretation

NOTE

Measure leadership persistence and defensive rotation as signs of weakening market internals.

Objectives

NOTE

Evaluate whether the studied signal produces a measurable, repeatable edge.

Quantify the reliability of the observed patterns across the sample.

Methodology

NOTE

Statistical analysis using price data.

Limitations

NOTE

Results are research-grade, not investment advice. The sample is limited to available data, and measured edges may not persist out-of-sample.

Table 0

Glossary

Term	Definition
n / count	Number of observations or events in the sample.
edge	Average excess return versus the unconditional baseline.
hit-rate	Share of events with a positive forward return.
p-value	Probability of observing the result under the null of no edge.
*** / ** / *	Significance at 99.9% / 99% / 95% confidence.
α (alpha)	Intercept or active return versus benchmark.
β (beta)	Sensitivity to a reference factor or market.
σ (sigma)	Volatility / standard deviation of returns.
